HERD MANAGEMENT *Solutions*

2023-2024

THE FUTURE IS IN THE EAR

Your cow's ears are full of data. CowManager ear sensors measure ear temperature combined with behavior, giving you actionable insights about the health, fertility, and nutrition of your herd. Catch sick cows days before they show clinical signs and never miss a heat. Know exactly which cows to focus on – and why. www.cowmanager.com

BUILD A BETTER HEIFER®

CONVERT™ Calf Care Products

CONVERT™ calf-care products are a special blend of naturally occurring direct-fed microorganisms, unique and proprietary L-form Lactobacillus, microbial sugars, enzymes and specialized proteins. These ingredients help calves overcome environmental-related challenges. The products do not contain antibiotics and are proven to be safe and effective, making them excellent management tools for production.

Day-One Calf Gel
15 cc tube: 9003
60 cc tube: 9001

Day-One Calf Bolus
40 count jar: 9000

BIG Calf Powder
2.2 pound jar: 9017
*12.5 pound pail: 9018

Milk Replacer

The unique manufacturing technology of Accelerated Genetics' brand milk replacer formulations results in a 100 percent instantized product. The milk replacer powder goes into solution with minimal mixing and is consistent from the top to the bottom of the pail or bottle, while providing high digestibility and performance. All formulations contain the highest quality milk proteins, recommended levels of bio-available vitamins and minerals and Tri-Mic WD.

+ Contact your representative
for shipping quotes.

Calf Accellyte

This source of energy, electrolytes and fructo-oligosaccharides for nutritional support helps dairy and beef calves achieve optimal absorption of electrolytes and water. Great for calves experiencing scours, dehydration or heat stress.

90.7 gram packet: 9114
3.6 pound jar: 9108
10 pound pail: 9109
*25 pound pail: 9110

Accel RS

Restore, re-energize, recolonize and rehydrate your calves with Accel RS. Accel RS is a recovery solution (stress supplement and electrolyte combination) that aids in hydration and digestive health for calves. Includes Tri-Mic WD as a source of live naturally occurring microorganisms. Accel RS contains plasma to help with gut issues, functional proteins and glucose to provide energy, and electrolytes to correct and prevent metabolic acidosis.

4 ounce packet: 9116
6 pound pail: 9117
*25 pound bag: 9115

Calf Jackets

Calf jackets repel wet, cold and windy weather to keep calves warm and dry using a water repellent, durable outer shell and quick release buckles.

Small: 5006
Large: 5007

Calf-Tel® Hutches

Available in ECO, Deluxe II, PRO II, XXL, MultiMax and the pen system. Additional accessories are also available. Contact your representative for shipping quotes as all products are direct shipped from the manufacturer and no inventory is kept on trucks.

BUILD A BETTER HEIFER®

First Day Formula®

First Day Formula® is 100 percent dried colostrum. It's simple: open the package, mix and feed. First Day Formula is also scientifically proven: 299 of 300 calves fed First Day Formula had virtually 100 percent successful passive transfer (99.9966 percent.)

First Day Formula Deluxe features the benefits of First Day Formula colostrum replacer with First Defense Technology™.

Colostrum Replacer
500 gram packet: 9043
*20 pound pail: 9044

CR Deluxe
500 gram packet: 9045
*20 pound pail: 9046

Tri-Mic WD

Tri-Mic WD is a water dispersible direct-fed microbial. It is formulated to help stimulate feed intake during periods of change. Tri-Mic WD improves calf gut health by establishing beneficial microbial populations, thus improving average daily gain by reducing occurrence of scours and promoting gastrointestinal microflora. Mixes easily into pasteurized waste milk, milk replacer, or liquid feeds.

500 gram jar: 9105
5 kilogram pail: 9106

Tri-Purify

This natural dietary feed supplement for pre-weaned calves is a nutraceutical and direct-fed microbial to be administered at specific times or as needed for digestive upsets/scours. It provides pure, natural essential oils that have strong anti-bacterial effects (cleansing action) which improve the natural immune system, and it enhances the environment of the digestive tract and promotes gastrointestinal microflora, improving daily gain.

Recommended to be followed by Tri-Start Jr.

36 count jar: 9107

Tri-Start Jr.

This direct-fed microbial helps stimulate feed intake during periods of change. Tri-Start Jr. improves gut health with a guaranteed viable count of 20 billion colony forming units of naturally occurring microorganisms. It reduces occurrence of scours and promotes gastrointestinal microflora, improving average daily gain. Containing live lactic-acid forming bacteria, live cell yeast and fungal extracts, it helps to reestablish beneficial microbial populations during times of stress.

Recommended for use 12 hours after final treatment with Tri-Purify capsules.

36 count jar: 9102

Tri-Start Jr.+ Paste

Tri-Start Jr.+ Paste is an easily administered, versatile tool for stimulating feed intake during periods of stress and following treatment for scours. Its unique blend of ingredients works to populate the gut with beneficial microbials, maximize nutrient absorption, protect the calf from specific pathogens and support immune development.

10 cc tube: 9121
60 cc tube: 9120
300 cc tube: 9118

AccelAIRate

A nutraceutical to support the respiratory system of young cattle with natural essential oils, herb extracts and antioxidants. AccelAIRate reduces oxidative stress by increasing the level of antioxidants in the blood and capturing free radicals. This powerful combination activates the immune system helping calves combat diseases and speeds up the time it takes for calves to recover from respiratory challenges. This combination of immune enhancers, antioxidants and anti-inflammatory agents helps reduce the incidence of infections, decreases oxidative stress and improves animal performance.

4.4 pound bag: 9122
22 pound bag: 9123

MAXIMIZE COW PERFORMANCE™

Designed to help cattle overcome the negative effects of mycotoxins and other challenges, the Select BioCycle™ family of products includes a proprietary L-form bacteria and other ingredients that stimulate a cow's immune response. Weak heats, high SCC, poor conception, lost milk production, poor digestion, low feed intake, cystic ovaries and more can be confronted with this family of direct-fed microbials.

Got toxins? Select DTX™ can help a cow's immune system overcome effects of mycotoxins, which are common with today's growing conditions and management practices.

*50 pound box: 9097
*Concentrate - 50 pound bag: 9098

A 'high-tech' nutritional supplement, Select BioCycle® is fed specifically to deal with gram negative imbalances in the intestinal tract to aid in boosting immune function and digestion as well as fight environmental challenges.

*50 pound box: 9091
*Concentrate - 50 pound bag: 9092

Select BioCycle Showcase Formula™ is specifically formulated for both growing calves and high-genetic value show animals. Select BioCycle Showcase Formula contains L-form bacteria which enhance the function and population of microflora in cattle to aid in better digestion and nutrient use. Protect your investment and have them healthy for the next show.

*12.5 pound pail: 9020

MAXIMIZE COW PERFORMANCE™

“BioCycle Plus® has helped us manage and contain potential toxins in our feed. In return, we have seen improved reproductive events in our herd including stronger heats and improved pregnancy rates.”

Nathan Thomas
Triple-T Holsteins and Jerseys
North Lewisburg, OH

Photo Cowsmopolitan

A combination of both Select DTX™ and Select BioCycle®, Select BioCycle Plus® is a good choice for producers who want to improve reproductive performance and health in their herd and suspect that mold toxins may be in the feed.

*50 pound box: 9095

*Concentrate - 50 pound bag: 9096

BIOFRESH® MICROBIAL GEL

A new direct-fed gel for cattle of all ages to enhance feed intake, improve ruminal fermentation and support immune function during off-feed or low-intake periods. The microbial gel utilizes beneficial bacteria, specialized proteins and vitamins A, D, and E to support the cow's health.

280 ml tube: 9051

BIOFRESH® MICROBIAL BOLUS

This individual animal supplement is formulated for fresh, high-SCC, treated, sick or off-feed cows. The bolus puts crucial digestive enzymes, yeast, L-form bacteria, vitamins and minerals in the gut to boost a cow's immune system.

50 count jar: 9050

*400 count jar: 9060

Ca3 BIOFRESH®

Ca3 BioFresh® is the safe option when you need to give your cows a good non-caustic calcium supplement. Ca3 BioFresh contains 45.5g of calcium in one bolus and 50,000 IU of vitamin D3. Ca3 increases blood Ca levels and improves reproduction and SCC. One bolus offers 3 forms of calcium for continual ruminal absorption.

- Calcium acetate for quick passive absorption in the rumen.
- Calcium sulfate for a moderate speed of ruminal absorption.
- Tricalcium phosphate for a longer term continual ruminal absorption.

1 bolus: 9015

1 case = 48 boluses

* = direct shipped only **7**

MAXIMIZE COW PERFORMANCE™

Tri-Mic 1:50

Improve feed intakes and feed utilization for maximum production and reproductive performance with Tri-Mic 1:50. Ideal for allowing a smooth transition from the dry diet to the higher-energy, concentrated diets required for high milk production. Also effective for countering the negative effects of heat stress, poor-quality feed, calving stress, metabolic disorders or other negative environmental conditions. Add Tri-Mic 1:50 to the pre-fresh and fresh-cow ration, to high-lactation groups, or use for heifers during periods of stress.

4 pound bag: 9103
*20 pound bag: 9104

Tri-Start

Tri-Start enhances the rumen environment to improve digestive performance and repopulate rumen microflora after periods of stress. This product re-establishes beneficial microbial populations following antibiotic treatment, feed challenges, out-of-condition feed and other incidences of environmental stress. For maternity and sick pens, give one bolus the day she enters the pen, give one the day she calves and one the day she leaves the pen.

25 count jar: 9100
100 count box: 9101

Bovine Accellyte II

A specialized electrolyte for periods of stress, rehydration and pre-hydration. Can be dry mixed into feeds for group or herd application during periods of stress, such as calving, vaccinations, feed changes, temperature extremes and illness. It also can be used as a drench, added to stock tanks or individual water feedings.

Take advantage of our pre-booking discount program in spring of 2024!

10 pound pail: 9111
*25 pound bag: 9112

Freshen Up

Fresh-cow protocol to be administered immediately after calving to reduce the incidence of milk fever, retained placenta and ketosis. Unlike other products, Freshen Up contains palatable ingredients so it can be used as a drench or offered free choice. This product contains a combination of calcium and sugar sources that can help to reduce instances of metabolic issues. To administer, mix one pound of Freshen Up with warm water per application.

10 pound pail: 9061
*35 pound pail: 9062

COW ACTIVITY MONITORING SYSTEM

The CowManager® system is a continuous three-in-one heat, health and rumination herd monitoring system. All measurements are taken by a computer microchip that is combined with the cow's ear tag making it different from any other system on the market.

Contact your local representative for details on installing CowManager in your herd today. Scan the QR code for more information.

Health

Providing early and reliable detection of cow ailments can be a large cost savings. Early detection means there are less health issues, reduced use of antibiotics, decreased production loss and lower labor costs. The CowManager system can alert you to possible ailments including: mastitis, E. Coli, uterine infections, hardware disease, displaced abomasums and diarrhea.

Find My Cow

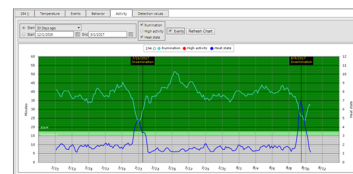

Find my Cow's user-friendly cow locator fits in your pocket and enables you to locate cows in the barn, outside on the feed lot or on pasture. This feature is fully integrated with all of CowManager's modules. The Find my Cow locator can be used by a variety of employees to find a cow or multiple cows quickly.

Nutrition

The nutrition module provides a reliable measurement of the number of minutes each cow spends eating, grazing and ruminating. By providing insight into the eating behavior of individual cows, management groups and the entire herd, CowManager gives you the perfect assessment of the right ratio for your herd, and is an excellent tool to monitor cows in the transition period.

Fertility

Use the fertility module for reliable heat detection. Not only does it provide information on the optimal time for insemination, but it also provides insights into the cow's cycle, giving you all of the information needed to make a pregnancy. The CowManager system is here to help you decrease insemination costs, increase pregnancy rates and shorten intervals between calving.

UDDER CARE

EfferCept® SG
PRE / POST TEAT DIP

Nothing compares to the fast-acting EfferCept® SG teat dip for powerful killing, cleaning and conditioning even in the presence of dirt, manure and other organic matter. The same EfferCept proven effective as a germicide for use as a pre- and post-teat dip or spray now is aloe-enriched with additional cleaning power. EfferCept SG penetrates to protect, condition and soften teats and udders.

20 count jar:	4120
110 count refill:	4119
550 count bucket:	4121

EfferCept®
PRE / POST TEAT DIP

The perfect pre-dip! Effective against a wide range of mastitis-causing organisms, EfferCept's killing action is released when added to water. With twice the germicidal effect of bleach, it has a neutral pH level that's gentle on skin. The convenient tablet form is easy to use, handle and store.

50 count jar:	4110
220 count refill:	4112
1,540 count bucket:	4122

UDDERgold®
5-STAR

UDDERgold® 5-Star barrier post-dip conditions the teat and fights mastitis with 12 hours of germicidal activity and a protective barrier. Use to protect against contagious Strep., Staph., and other environmental organisms.

5 gallon set:	4104
*15 gallon set:	4105
*55 gallon set:	4106

4XLA®

Designed as a pre- and post-dip with extra conditioning power, 4XLA® is the ideal dip if you want the power of UDDERgold 5-Star but don't need the barrier. Proven effective with only 15-second kill time against environmental and contagious organisms, including Staph. aureus, 4XLA replenishes the cow's natural defenses for fighting mastitis.

5 gallon set:	4107
*15 gallon set:	4108
*55 gallon set:	4109

UDDERMINT®

The original antibiotic-free, peppermint-oil-based liniment, UDDERMINT® helps reduce udder edema, hard quarters and swollen hocks within 12-24 hours of application.

White 500 milliliter:	4000
White 2.5 liter:	4002
2.5 liter dispenser:	4004

HEAT DETECTION

ESTROTECT™ HEAT DETECTOR

Self-adhesive and easy to apply, ESTROTECT™ stays in place no matter what the weather. After several mountings, a colored signal layer is exposed, detecting standing heat with accuracy. No glue necessary.

ESTROTECT Bullseye: 3020

Colors Available: Red/Orange, Blue, Green, Fuschia & Yellow (All Priced Individually)

KAMAR® Heatmount® Detectors

KAMAR® Heatmount® Detectors are activated only after a cow has been mounted for three seconds or more. This built-in timing mechanism eliminates false positives.

25 count box: 3001
50 count box: 3002
Adhesive: 3003

MARK-HER™ Livestock Marking Paint with Bitterguard®

A different type of tail paint, MARK-HER™ was developed for various uses on the farm. MARK-HER is a long-lasting, highly visible paint that is durable. Use for marking cattle in synchronization programs, marking pregnant or fresh dates on cattle or when inserting CIDRs.

Tail Paint: 3013

EAZI-BREED™ CIDR®

Approved for lactating dairy and beef cows, CIDRs can help narrow the window of estrus and improve the timing and efficiency of your current breeding program. Synchronize heats and induce estrus. Insert the CIDR to continuously release progesterone, then remove seven days later, detect heat and breed.

Individual price - 10 per pack: 3004
CIDR Applicator: 3005

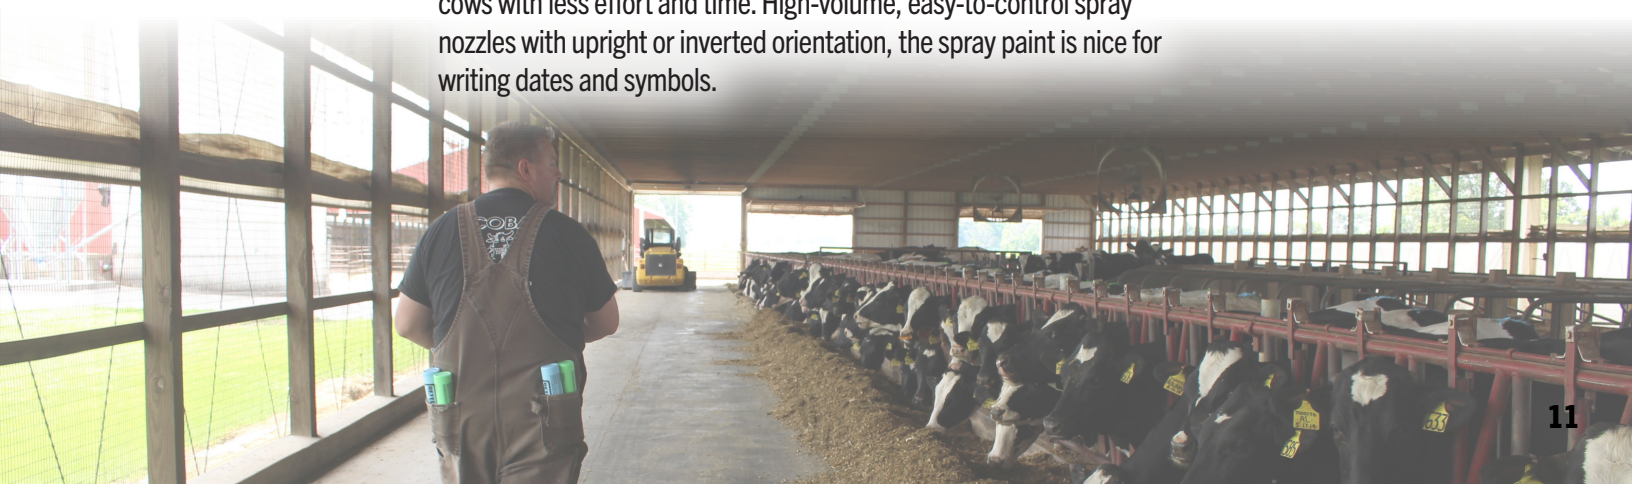

DETECT-HER™ TAIL PAINT with Bitterguard®

Easy to apply, DETECT-HER™ tail paint is a combination of adhesive and latex paint specially formulated for heat detection. Thicker than other tail paints, DETECT-HER allows for a more controlled application with less waste. A pocket-sized, soft bottle makes squeezing easy, and it is water soluble for easy clean-up. One bottle paints 30 to 40 head on the first application.

By making longer lasting bright marks that don't need touched up every day, DETECT-HER spray paint enables breeders to walk more cows with less effort and time. High-volume, easy-to-control spray nozzles with upright or inverted orientation, the spray paint is nice for writing dates and symbols.

Wipe-On Paint: 3012
Spray Paint: 3015
Available in various colors.
